

## Objective

---

Seeking a responsible career position, open to learn and develop suitable skills which offer a high level of challenge and adding value to the organization. Participate in training programs to achieve better results and learn for quick adoption to changing needs.

## Experience Summary: (2.3 years)

---

- 2.3 years of IT experience with primary focus on **Web/Mobile** application development.
- Good understanding of **Object Oriented** Concepts.
- Excellent expertise in **AngularJS, HTML5, JavaScript, JQuery, ExtJS, CSS3**.
- Good Knowledge in **Node.js, MongoDB, SQL-Server 2008, MYSQL5.0**.
- Good in **Sencha Technology: ExtJs 4.1**.
- Good in core java, core php.
- Excellent inter-personal, Leadership skills and quality conscience.
- Having good domains knowledge in web and E-Commerce.
- Always willingness to learn new technology and acceptance of challenges.

## Employment History:

---

- **RapidValue IT Services Pvt. Ltd**, from May 2014 to till date.

## Achievements:

---

Completed certification for **MongoDB:-**

## Education:

---

**MCA** from Bangalore University, Bangalore.

**BSc in Computer Application** from TMBU University, Bhagalpur (Bihar).

## Software Skills:

---

<b>Scripting/Styling/ Program</b>	: AngularJS, NodeJS, ExtJS, JavaScript, HTML5, JQuery, CSS3
<b>Web Technologies</b>	: AngularJS 1.3, NodeJS 4.2.2, Restify, ExtJS 4.1, php and HTML5
<b>Database</b>	: SQL-Server 2008, My-SQL, MongoDB.
<b>Version Control</b>	: Tortoise SVN.
<b>Design Pattern</b>	: MVC, MVP.
<b>IDE's</b>	: Visual Studio 2010, web Storm, Net Beans, Notepad++ and Eclipse.
<b>Operating System</b>	: Windows 7/Mac/XP, Linux.
<b>Tools</b>	: WinScp, VPN
<b>Knowledge</b>	: JSON, XML, Ajax, Web service, GitHub
<b>Modeling Tools</b>	: MS Office (Word, Excel, Power Point and Access)
<b>Other Systems</b>	: JIRA, Assembla, Apollo

## IT Projects

### Rapid Value, MAY 2014 to March 2015

<b>Project</b>	<b>Carnegie Learning</b> 
<b>Client</b>	<b>Carnegie University, US</b>
<b>Description</b>	<p>Cognitive Tutor (CT): CT is a cross platform application useful for both, the students and the teachers. Some of the features provided by CT are Step By Step Example, Lesson page, problems to solve for a particular unit, Hints to help the student solve a problem, and Skilometer to track progress in each section. Carnegie Learning's solutions include math textbooks with student-centered, collaborative classroom activities along with innovative, adaptive software and teacher professional development.</p> <p>Carnegie Learning provides innovative, research-based math curricula for middle school and high school students that are consistent with the Standards for Mathematical Practice.</p>
<b>Responsibilities</b>	<ul style="list-style-type: none"> <li>• Played an active role as module Lead and developer.</li> <li>• Involved in understanding and analyzing the requirements, impact analysis, analyzing requirement gaps and documents preparation.</li> <li>• Responsible for providing the estimation for requirements.</li> <li>• Responsible to delegate work, explaining the requirement and monitoring the work progress.</li> <li>• Involved in developments of various modules using AngularJS framework. Used HTML5 pages to develop the web interface used custom directive tags for creating complex web pages.</li> <li>• Preparing and executing Unit test cases.</li> <li>• Implementing Change requests (CR).</li> <li>• Responsible for Bug fixing.</li> <li>• Responsible for design, code and screen specification review.</li> <li>• Coordinated with my team members in solving project related and technical issues.</li> <li>• Responsible for making sure team adhering to coding standards in the application.</li> <li>• Providing technical solutions to team, making technical decisions, conducting internal trainings and assisting team in critical deadlines.</li> <li>• Interacting with Onsite coordinator</li> </ul>
<b>Technology</b>	<b>AngularJS, HTML5, and CSS3</b> <b>Eclipse IDE</b>

**Rapid Value, APRIL 2015**

<b>Project</b>	<b>Mobile Tracking System</b>
<b>Client</b>	<b>MEAN STACK POC (INTERNAL POC - RVS)</b>
<b>Description</b>	Mobile Tracking System is mobile based application, this poc done in full MEAN STACK. We learn the MEAN Stack and did POC in MEAN (MongoDB, ExpressJS, AngularJS And NodeJS) full Stack for Internal Project RVS.
<b>Responsibilities</b>	<ul style="list-style-type: none"><li>• Learn Full MEAN stack.</li><li>• Played an active role as track Lead and developer.</li><li>• Involved in understanding and analyzing the requirements, and development of various modules in different releases.</li><li>• Used NodeJS, MongoDB, ExpressJS And AngularJS</li><li>• Coding, testing and creating REST API.</li></ul>
<b>Technology</b>	<b>MEAN STACK And web Storm</b>

**Rapid Value, APRIL 2015 to JUNE 2015**

<b>Project</b>	<b>Devon/Production Portal</b>
<b>Client</b>	<b>Seven Lakes technologies, US</b>
<b>Description</b>	Devon/Production Portal is a web application, mainly design and developed for US client. This is the Application for Production Management System of oil and gas agency. Authorized client can login and see all the Production details. Details will be shown in graph, bar, pie charts and grids and all other different graphical view.
<b>Responsibilities</b>	<ul style="list-style-type: none"><li>• Played an active role as track Lead and developer.</li><li>• Involved in understanding and analyzing the requirements, and development of various modules in different releases.</li><li>• Used Sencha EXTJs, HTML5, jQuery and Css3 for creating complex web pages.</li><li>• Coding, testing and deploying the web application using WinScp Tool.</li><li>• Responsible for making sure team adhering to coding standards in the application.</li><li>• Analyzing and solving the technical problems faced by team.</li><li>• Responsible for Bug fixing individual components.</li></ul>
<b>Technology</b>	<b>ExtJS, JQuery, Ajax, CSS3 and NetBeans IDE</b>

**Rapid Value, JUNE 2015 to JULY 2015**

<b>Project</b>	<b>Market Voice Magazine</b>
<b>Client</b>	<b>Market Voice Magazine, US</b>
<b>Description</b>	Market Voice Magazine is web based application. This project is develop for online magazine, this is the site of online publication website. These are developed for the clients of my company as per their requirement. Basically this application also developed for the admin section where admin can change the new month publication details and article published and can manage all other things which are required for the current publication. Its responsive website, which can access all type of device.
<b>Responsibilities</b>	<ul style="list-style-type: none"><li>• Played an active role as track Lead and developer.</li><li>• Involved in understanding and analyzing the requirements, and development of various modules in different releases.</li><li>• Used Drupal, HTML5, JavaScript JQuery and Css3 for creating complex web pages and for all other device.</li></ul>
<b>Technology</b>	<b>DRUPAL, HTML5, JavaScript, JQuery, CSS3 and Notepad++</b>

**Rapid Value, AUGUST 2015 to OCTOBER 2015**

<b>Project</b>	<b>Delighterr</b>
<b>Client</b>	<b>Delighterr , US</b>
<b>Description</b>	This is the Application for client proposal Management System. This is developed for the clients of my company as per their requirement. Admin can manage all the descriptions and details of websites using this application.
<b>Responsibilities</b>	<ul style="list-style-type: none"><li>• Played an active role as module Lead and developer.</li><li>• Involved in understanding and analyzing the requirements, impact analysis, analyzing requirement gaps and documents preparation.</li><li>• Responsible for providing the estimation for requirements.</li><li>• Responsible to delegate work, explaining the requirement and monitoring the work progress.</li><li>• Involved in developments of various modules using AngularJS framework. Used HTML5 pages to develop the web interface used custom directive tags for creating complex web pages.</li><li>• Preparing and executing Unit test cases.</li><li>• Implementing Change requests (CR).</li><li>• Responsible for Bug fixing.</li><li>• Responsible for design, code and screen specification review.</li><li>• Coordinated with my team members in solving project related and technical issues.</li></ul>

	<ul style="list-style-type: none"> <li>Responsible for making sure team adhering to coding standards in the application.</li> <li>Providing technical solutions to team, making technical decisions, conducting internal trainings and assisting team in critical deadlines.</li> <li>Interacting with Onsite coordinator</li> </ul>
<b>Technology</b>	<b>NodeJS, Restify, MySQL, AngularJS and Html5 AND Eclipse IDE</b>

### Rapid Value, November 2015 to May 2016

<b>Project</b>	<b>Project – Quantinsti (LMS)</b>
<b>Client</b>	<b>Quantinsti, Singapore</b>
<b>Description</b>	<p>Quantinsti is a learning management system application basically its cross platform application useful for both, the students and the teachers.</p> <p>In this application Teacher role, teacher can create the course, in that course can have multiple sections and each section can have multiple units like text book chapter. Basically teacher can create the course of six types of units as video, audio, documents, presentation, exercise and quiz. In exercise unit Step By Step Example, Lesson page, problems to solve for a particular unit, Hints to help the student solve a problem, and progress bar to track progress in each section for every course.</p> <p>In this application Student role, student can see the list of the course and can enroll the course if course is free then just enroll and if course is paid then need to pay the amount of the specific course to enroll the course. After enroll the course user can study that specific course and there some other many functionality for the students to use this application.</p> <p>There is one main part developed of this application is simulator, which student can launch the simulator and can run the script and algorithm, student can write and run the algorithm in two language python and R. once student write the algorithm and run the simulator to get the result and based on graph if algorithm is correct else user will get the error and warning based on the written algorithm. Teacher and Students both can use the simulator.</p>
<b>Responsibilities</b>	<ul style="list-style-type: none"> <li>Played an active role as module Lead and developer for front-end and back-end both.</li> <li>Involved in understanding and analyzing the requirements, impact analysis, analyzing requirement gaps and documents preparation.</li> <li>Responsible for providing the estimation for requirements.</li> <li>Responsible to create all type of estimation document during the project development.</li> <li>Responsible to delegate work, explaining the requirement and monitoring the work progress.</li> <li>Involved in developments the entire API's for whole application of various modules using NodeJS. Used MySQL for architect the DB Design work flow &amp; develop connect the DB using Script.</li> <li>Involved in developments of various modules using AngularJS framework.</li> </ul>

	<p>Used HTML5 pages to develop the web interface used custom directive tags for creating complex web pages.</p> <ul style="list-style-type: none"><li>• Preparing and executing Unit test cases.</li><li>• Implementing Change requests (CR).</li><li>• Responsible for Bug fixing.</li><li>• Responsible for design, code and screen specification review.</li><li>• Coordinated with my team members in solving project related and technical issues.</li><li>• Responsible for making sure team adhering to coding standards in the application.</li><li>• Providing technical solutions to team, making technical decisions, conducting internal trainings and assisting team in critical deadlines.</li><li>• Interacting with client daily basis to understand the requirement and give demo for progress of the project.</li></ul>
<b>Technology</b>	<b>NodeJS, Restify, MySQL, AngularJS and Html5 AND Eclipse IDE</b>
